CHAFEE ANNOUNCES \$1,280,914 IN NAVY CONTRACTS FOR RHODE ISLAND COMPANIES

WASHINGTON, DC – U.S. Senator Lincoln Chafee today announced that the Electric Boat Corporation will receive contracts totaling \$1,280,914 from the United States Navy with work being done in both Newport and Quonset. The money will be used for work on VIRGINIA Class submarines at both locations.

“Military contracts are very important to Rhode Island businesses,” said Senator Chafee. “I am pleased that this contract gives Rhode Island the chance to be a part of this project to stimulate our economy while protecting our country,” Chafee continued.

The contracted money will provide services to maintain, update, and support the VIRGINIA Class submarines. The money will also fund updated technology and engineering for support of the submarines.
